

Carpark Domes

Stainless Steel Carpark Domes

- Simple installation
- Reduce property damage
- Suitable for Concrete, Asphalt, Tile, Stone and Pavers

Metal carpark corner domes are installed to define edges and protect kerbs, islands, and landscaping in parking areas. They help guide vehicle movement, discourage corner-cutting, and reduce damage in tight turning zones while remaining low-profile and unobtrusive.

Installation guide

Install Carpark Domes to required areas as marked in accordance with manufacturer's recommendation. For the best results we can provide installation.

Application

Exterior
