

BLDSMGV 165X1100

Galvanised Steel Surface Mount Bollards

- Simple installation
- Reduce property damage
- Suitable for Concrete, Asphalt, Tile, Stone and Pavers

Our Galvanised Steel Surface Mount Bollards are purpose-built for traffic control and property and asset protection, ideal for guarding your vulnerable property, plant and equipment.

Made from tough galvanised steel, these bollards are bolted onto a concrete surface to protect pallet racking, door tracks, corners of walls, buildings, and much more. Available with a flat cap in either natural galvanised or yellow galvanised colours.

Installation guide

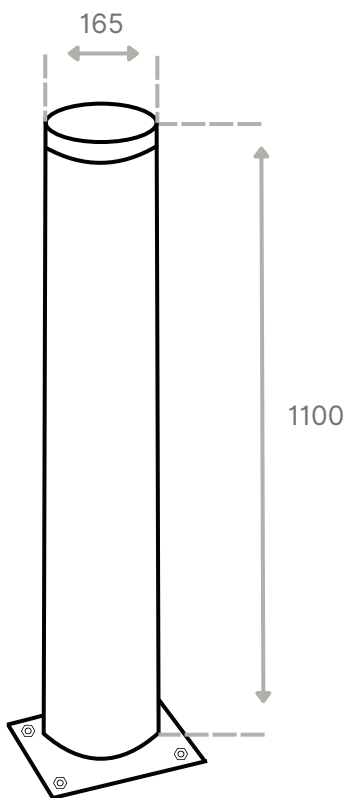

Install bollards to required areas as marked in accordance with manufacturer's recommendation. For the best results we can provide installation.

Application

Exterior

Colours

Natural, Yellow
